## 1 General Instructions

The following pages represent the iRAPT Data Element/Segment Cross Reference for reporting 810C EDI data into iRAPT, including UID information. The tables that follow present the usage of the Segments and Data Elements arrayed in Transaction Set Order. Only the Segments that iRAPT accepts are outlined below. The information represents 810C (Commercial, Fast Pay, CICON for Construction Invoices, Invoice 2n1, NAVCON for Navy Construction Invoices and Energy Invoices.) X12 transactions into Invoicing, Receipt, Acceptance and Property Transfer (iRAPT). This EDI Guide was created using the latest draft of the Implementation Conventions.

**NOTE:** If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create EDI files, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to iRAPT. This converts the text to text-only format and removes control characters that contain formatting information.

### **Sending Attachments to iRAPT:**

**To send attachments to iRAPT that are related to an EDI transaction via SFTP, Vendors must use the attachment code "E9" (See REF Segment at Pos. 050) to associate the attachment with the transaction.**

**iRAPT provides Vendors the capability to manually FTP over attachments electronically. These attachments can then be referenced and attached to inbound EDI transactions. Please contact the Help Desk for assistance in setting up a directory on the FTP server to submit attachments using this method. Once set up with a directory, Vendors will need to FTP over their file as a separate action from submitting the EDI file. The attachment needs to be present on the server at the time the inbound EDI file is processed by iRAPT.**

**To send attachments to iRAPT via EDI, Vendors may also use the 841 EDI Transaction Set. Vendors may not use the 841 EDI Transaction Set for anything other than sending attachments.**

**Please refer to the EDI\_iRAPT\_Guide.doc for detailed EDI enveloping instructions for attachment data as only one document (i.e. one Transaction Set) can be transmitted with one 841 in an ISA/IEA when attachment data is submitted to iRAPT.**

**WARNING: Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into iRAPT.**

Each Segment table includes the following:

- |                     |  |
|---------------------|--|
| 1. Data Segment     | X12 Segment  |
| 2. Description      | X12 Name   |
| 3. Element          | X12 Data Element Reference Number  |
| 4. Format & Min/Max | Specific to iRAPT, not ANSI X12  |
| 5. Requirements     | Depicts whether the Segment is:<br><b>M</b> – Mandatory – Usage is required.<br><b>O</b> – Optional – Can be used or not used.<br><b>C</b> – Conditional – Contingent upon another criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.)_See Notes Column for specific instructions.<br><b>N/A</b> – Not Allowed |
| 6. iRAPT Notes      | Contains notations of the Field’s usage or restrictions  |

Fields included within iRAPT display the “Type” Field depicting the value used.

- **Nv** Numeric Field where v = number of decimal positions, decimal implied (i.e. 300 will be read as 3.00)
- **R** Decimal number. If value includes decimal, then iRAPT requires decimal point and value be sent: iRAPT will NOT imply or assume decimal points.  
Examples:
  - 300 will be read into iRAPT as “300”
  - 3.00 will be read into iRAPT as “3”
  - 3.5 will be read into iRAPT as “3.5”
- **ID** Identifier
- **AN** Alpha/Numeric String
- **DT** All date Fields will use format CCYYMMDD
- **TM** All time Fields will use the format HHMMSS

**Notes:**

- Above and below each Segment there are notes pertaining to iRAPT. The values that iRAPT accepts are also noted. By default, iRAPT rejects all codes not identified in this guide. In cases where iRAPT ignores a code instead of rejecting the document, a comment to that effect will be displayed in the Segment.
- The word “must” in a Segment Note implies that the Segment is mandatory. The word “may” in a Segment Note implies that this Segment is Conditional based on the terms of the contract or the needs of the contractor.
- Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- If an Invoice is submitted and identified as a possible duplicate, the log will include the following warning message: “Please verify that this document is not a duplicate of INVNO001.” This validation will not prevent the document from being created. Invoices are identified as a possible duplicate when the following criteria is met:
  - Contract Number and Delivery Order Number match.
  - Request/Invoice/Voucher Number match, excluding the trailing alpha character.
  - Previously submitted document status is not void.
  - Invoices must have the same gross amount.

- Period of Performance Dates, Service Start/End Dates, and Estimated Delivery Date match.
- For each matching Line Item, the Quantity Shipped and Unit Price match.

**1.1 ST Segment – Transaction Set Header, Pos. 010 - Header****NOTE:** There must be only one instance of ST per transaction.

**Notes:**

BIG02 – When creating an Energy Price Corrected Invoice, the Invoice number should begin with the appropriate prefix. For example, if the original Invoice Number were INV0001, the first Energy Price Corrected Invoice Number would be UPADJAINV0001, followed by UPADJBINV0001, UPADJCINV0001, etc. If the prefix is not included, iRAPT will automatically generate the prefix.

BIG04 – EDA contracts used to create Fast Pay Invoices must contain a Fast Pay Clause.

BIG08 – Enter “CO” to create an Energy Price Corrected Invoice. When creating an Energy Price Corrected Invoice, enter the Lookup Invoice Number in the REF02 at Position 050 where REF01 = ‘PX’. When an Energy Invoice is submitted with the Correction Indicator set and without a Lookup Invoice Number, a new Energy Price Corrected Invoice will be created. When an Energy Invoice is submitted with the Correction Indicator set and with a Lookup Invoice Number, iRAPT will attempt to locate the original Energy Invoice using the CAGE Code, Contract Number, Delivery Order Number, Pay DoDAAC, and Lookup Invoice Number. If a document is found, a new Energy Price Corrected Invoice will be created using the previous invoice as a template. While all mandatory data elements must be submitted in the transaction to satisfy EDI X12 requirements, only the unit price for the line items will apply to the Energy Price Corrected Invoice. If a document cannot be found based on the Lookup Invoice Number, a new Energy Price Corrected Invoice will be created.

For Void or Void & Replace documents (when BIG08 = “01” for Void or “05” for Void & Replace, the following Key data elements cannot be changed:

Contract Number, (BIG04)  
 Delivery Order Number, (BIG05)  
 Invoice Number, (BIG02)  
 Shipment Number, (REF02 at position 120 when REF01 = SI or FS)

Void and Void and Replace action types are unavailable for Credit Invoices.

BIG09 – If “F” is entered, Final Invoice Indicator in iRAPT will be set to “Y”. If “IN” is entered, the Final Invoice Indicator in iRAPT will be set to “N”.

### **BIG04 and BIG05 Contract Number and Delivery Order Edits**

#### **Contract Type is “DoD Contract (FAR)”; Fiscal Year 17 and later**

##### **Contract Number Edits:**

- No special characters allowed.
- Must be 13 characters in length.
- Contract cannot contain "O" or "I" at any position.
- First 6 positions must be a valid government DoDAAC.
- Positions 7 and 8 (FY parameter) must be numeric and greater than or equal to 17 and less than 66.
- Position 9 must be alpha.
- Position 9 may not be: B, E, I, J, O, Q, R, U, W, X, Y, or Z.
- Position 10 through 13 in the Contract Number may not be “0000.”

##### **Delivery Order Number Edits:**

- No special characters allowed.
- Must be 13 characters in length.
- Delivery Order Number may not contain "O" or "I" at any position.

- First 6 positions must be valid government DoDAAC.
- Positions 7 and 8 (FY parameter) must be numeric and 17 or greater and less than 66.
- Position 9 must be F.
- Position 10 through 13 in the Delivery Order Number may not be “0000” (all zeroes).
- Delivery Order is prohibited when the 9<sup>th</sup> position of the Contract Number is C, F, H, M, P, or V.
- For Acquisition, Delivery Order is required when the 9<sup>th</sup> position of the Contract Number is A, D, or G.

**Contract Type is “DoD Contract (FAR)”; Fiscal Year 16 and prior**

**Contract Number Edits:**

- No special characters allowed.
- Must be 13 characters in length.
- Contract cannot contain "O" or "I" at any position.
- First 6 positions must be a valid government DoDAAC.
- Positions 7 and 8 (FY parameter) must be numeric and less than 17 or greater than 65.
- Position 9 must be alpha.
- Position 9 cannot be - B, E, I, J, N, O, Q, R, T, U, or Y.
- Position 10 through 13 in the Contract Number may not be “0000.”

**Delivery Order Number Edits:**

- No special characters allowed.
- Must be 0, 4, or 13 characters in length.
- May not contain "O" or "I" at any position.
- For Acquisition, Delivery Order required when the ninth position of Contract Number is A, D or G.
- Delivery Order prohibited when ninth position of Contract Number is C, F, M, P, V, or W.
- If the Delivery Order is 4 characters, the following edits will be applied:
  - The characters “A” and “P” are prohibited in the first position of 4-character Delivery Order Number.
  - “0000” is not acceptable value.
- If the Delivery Order is 13 characters, the following edits will be applied:
  - First 6 positions must be valid government DoDAAC.
  - Positions 7 and 8 must be numeric.
  - Position 9 must be F.
  - Positions 10 through 13 cannot be all zeroes.

**Contract Type is “Uniform PIID (FAR 4.16)”**

**Contract Number Edits:**

- No special characters allowed.
- Must be 13 to 17 characters in length, inclusive.
- Contract cannot contain "O" or "I" at any position.
- First 6 positions must be a valid government FEDAAC.
- Positions 7 and 8 (FY parameter) must be numeric and 16 or greater.
- Position 9 must be alpha.
- Position 9 cannot be: B, E, I, J, O, Q, R, U, W, X, Y, or Z.
- Position 10 through the end of the Contract Number may not be all zeroes.

**Delivery Order Number Edits:**

- No special characters allowed.
- Must be 13 to 17 characters in length, inclusive.
- Delivery Order Number may not contain "O" or "I" at any position.
- First 6 positions must be a valid government FEDAAC.
- Positions 7 and 8 must be numeric and 16 (FY parameter) or greater.
- Position 9 must be F.
- Position 10 through the end of the Delivery Order Number may not be all zeroes.
- Delivery Order is prohibited when the 9<sup>th</sup> position of the Contract Number is C, F, H, P, or V.
- For Acquisition, Delivery Order is required when the 9<sup>th</sup> position of the Contract Number is A, D, or G.

**Notes:**

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

*Notes:*

- The REF segment is optional for pay systems other than MOCAS and/or DCMA Administered, EBS.
- REF01 – Use FS for Final Shipment or SI if it is not a Final Shipment.
- REF01 – Use FA for Fast Pay, followed by REF02 noting FAR Clause No: 52.213-1. If FA is used, there must be two iterations of the REF Segment. One containing FA and FAR clause 52.213-1 in REF02, and other will contain SI or FS with Shipment Number in REF02.
- If REF01 is used, REF02 is required and REF03 is conditional.
- iRAPT ignores REF03 data for codes other than E9, FA, FS, SI, TG, or BL sent in REF01.
- MOCAS, DCMA, EBS: Commercial Invoices must include a Shipment Number and an FS or SI in REF01.
- MOCAS and/or DCMA Administered, EBS: If SI is used; the Shipment Number must be seven characters AAA A/N NNN. To indicate a Final Shipment, use the FS code in REF01 and an 8-character Shipment Number that contains a Z in the 8th position in REF02.
- MOCAS and/or DCMA Administered: Shipment Number is mandatory. Must be seven or eight characters in length and can have a Z in the eighth position. Format is as follows: first three positions alpha, fourth position is alpha/numeric, 5th - 7th positions are numeric, eighth position is only used for Final Shipment and is a Z.
- EBS: Shipment Number in REF02 is mandatory and must be 7 to 8 characters. If shipment number is eight characters, the eighth position must be a “Z” and REF01 must be “FS”.
- When creating a NAVCON document there must be at least one attachment. If creating a NAVCON document and the Final Invoice Indicator is Y (BIG09=F) and Construction Indicator is Y (BIG07=U9), then at least two attachments are required.
- The attachment referenced by the “E9” code in the table above represents functionality whereby an attachment can be submitted independently and associated to a submitted EDI transaction. Vendors have the ability to have the SAM set up an attachment directory that will allow the vendor to submit attachments for EDI transactions directly to the FTP Server.

- There may be multiple attachments per transaction as long as the total number of instances of the REF Segment does not exceed 12.
- SDN, ACRN and AAI are not allowed for Energy Invoices.
- When EDI submissions are identified as a “Draft”, the system will process them inbound using the following minimal data set requirements:
  - Vendor CAGE
  - Contract Number Type (Defaults to DoD Contract (FAR) if not entered)
  - Contract Number
  - Delivery Order Number
  - Pay Official DoDAAC
  - Document Type
  - Routing DoDAACs depending on the document type and pay system
  - Invoice/Shipment Number depending on the document type
  - If any Line Item data is submitted, the Item No is mandatory

Once submitted as a “Draft”, all documents must be processed via the web interface using the current “Save and Continue” functionality. There will be no ability to “add to a document” via additional electronic submissions.

- When creating an Energy Price Corrected Invoice, enter the Lookup Invoice Number in REF02 where REF01 = PX.
- If the Shipment Number is blank on the Invoice 2n1, the Invoice Number will be used as the Shipment Number (except for MOCAS and EBS which requires a Shipment Number to be included). If the shipment number is defaulted to the invoice number, then the final shipment indicator will be defaulted to the value of the final invoice indicator.
- REF02 – Creating a Fast Pay Invoice from an EDA contract: If the document is submitted without an Accept By location code or with an Accept By location code which is an active registered user for the role, the system will verify the Shipment Number is a valid, non-voided Receiving Report.
- When creating a Commercial Invoice 2-in-1 (Services Only) where the Acceptance and Payment locations equate to the FABS system, the application will require entry of the Communications Service Authorization.

### **REF01 - Reference ID Qualifier**

- FA Federal Acquisition Regulation (Fast Pay)
- FS Final Sequence Number (indicate suffix associated with Final Ship)
- SI Shipper’s Identification Number for Shipment (SID)
- TG Transportation Control Number (iRAPT will ignore)
- BL Government Bill of Lading

- BM Commercial Bill of Lading
- E9 Attachment Code
- CE Class of Contract Code (Construction Indicator), used for NAVCON when BIG07 = U9 (If left blank, this Field will default to N.)
- YP Selling Arrangement (Fixed Price Indicator), used for NAVCON when BIG07 = U9 (If left blank, this Field will default to Y.)
- CT Reference procurement Instrument Number or GSA Number
- KL Contract Reference
- 12 Billing Account (used to report AAA).
- CA Cost Allocation Reference (populates SDN Field in iRAPT)
- AT ACRN - Document level ACRN, will be populated down to the Line Item level.
- ACC Status (used to capture the Draft Indicator)
- PX Previous Invoice Number
- 8V Credit Reference
- 14 Master Account Number
- AH Communication Service Authorization

**1.6 N1 Segment – Name Segment, Pos. 070 - Header**

**NOTES:** There must be at least four instances of the N1 per Loop.

If N102 is entered, follow iRAPT specific requirements below for entering Address data. If all Address Fields are left blank (N102, N2, N3, and N4) Address information will be defaulted.

All addressing Segments (N102, N3, and N4) must be **completed** if an address is being entered. If a Location Code is being entered, then addressing data is not necessary. If Address data is being entered, these Fields at a minimum must be entered:

- For U.S. Addresses, Fields N102, N301, N401, N402, and N403 are the minimum required to complete the Address. Other Fields are optional.
- For Non-U.S. Addresses, Fields N102, N301, N401, N402, N403, and N404 are the minimum required to complete the Address. Other Fields are optional.
- For U.S. Military Addresses, Fields N102, N301, N403, N405, and N406 are the minimum required to complete the Address. Other Fields are optional.

For entry of an APO/FPO address, enter the APO/FPO Zip Code in the N403, the Military Address Indicator (i.e. AR) in the N405 and the APO/FPO code (i.e. AA, AE, or AP) in the N406.

The N1 loop may also be used to submit email addresses to which iRAPT will forward an additional workflow notice for the document. When submitting email addresses, only the N1 and PER segments should be submitted in the N1 loop.

### **Payment Systems Requirement Notes:**

- Vendor (PE) is mandatory.
- Pay Office DoDAAC (PR) is mandatory and must be a valid DoDAAC.
- Admin DoDAAC (C4) is mandatory and must be a valid DoDAAC.
- Ship (ST or SV) is mandatory. A CAGE, DUNS, or DUNS+4 should only be used when the Inspection and Acceptance Points in the Contract are Source/Source.
- Issue By DoDAAC (BY) is optional and must be a valid DoDAAC.
- LPO (PO) is mandatory for NAVCON (optional for CAPS-W).
- LPO (PO) is mandatory for One Pay DoDAACs.
- Inspect By DoDAACs (L1) is mandatory for NAVCON, optional for CICON, and otherwise not used.
- Mark For DoDAAC (Z7) is optional and must be a valid CAGE, DUNS, DUNS+4, or DoDAAC, used only for Fast Pay Invoices.
- Ship From (SF) is optional and must be a valid CAGE, DUNS, DUNS+4, or DoDAAC. Ship From is not allowed for NAVCON and CICON.
- Standard Pay DoDAACs – EDI inbound with a Standard Pay DoDAAC will only allow document types to be submitted that the Pay DoDAAC is signed up for and activated to receive Standard Workflow Extracts for. If any other document type is submitted for which the Standard Pay DoDAAC is not signed up to receive Standard Extracts, the document will be rejected with an error message.
- Standard Pay DoDAAC LPO Edit – iRAPT does not allow the entry of an LPO Location Code if the Pay office on the document is a Standard Pay DoDAAC. If an LPO is given, the file will be rejected with an error message, therefore when N101 = PO (LPO DoDAAC is not allowed for the Standard Pay System).
- A Contractor DoDAAC may be submitted in any field where a CAGE, DUNS, or DUNS+4 is permitted except where N101 = PE for Vendor.
- If the Payment Location is FABS, the Acceptance Location must also be FABS.
- If the Acceptance Location is a FABS location, the Payment Office must also be FABS.

**Notes:**

- For iRAPT, discounts are optional, however if discounts are being entered, please use either an ITD Segment with a discount type, a discount percent and a number of days or a discount type, a discount date and a discount amount, or a discount type and a net days. For Fast Pay, you must also enter an ITD Segment with the discount type of “21” to indicate that it is a Fast Pay Invoice, with no other Fields entered. If entering Fast Pay indicator (i.e. “21”), please use as first discount Segment entered prior to any other discounts.
- ITD01 is mandatory for iRAPT. Use 21 in ITD01 for Fast Pay.
- ICs allow for ITD02. iRAPT will reject transactions if ITD02 is used.
- iRAPT will reject transactions containing ITD09 and/or ITD10.
- iRAPT will reject transactions containing any code other than “22”, “08”, or “21” in ITD01.
- iRAPT requires ITDs be used in the following pairs: ITD03 and ITD05, ITD04 and ITD08, or ITD07.

**ITD08 – Discount Amount**

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

**iRAPT Payment System Edit Notes:**

- MOCAS:** Allows for only the discount combination of ITD03 and ITD05. Discount percentage is limited to NN.NN.
- EBS:** Allows for only one discount combination consisting of ITD03 and ITD05. Discount percentage is limited to NN.N.
- CAPS-C/W:** Allows for up to three sets of ITD03 and ITD05. An ITD07 (Net Days) discount is allowed. More than three sets of ITD03 and ITD05 or any ITD04 and ITD08 combinations will be rejected. Discount percentage is limited to NN.NNN. Discount amount not allowed.
- One Pay:** Allows two ITD03 and ITD05 combinations or one ITD04 and ITD08 combination. In addition, one ITD07 is allowed. Discount percentage is limited to NN.NN. For NAVCON – Net days = “14” when non-final Construction, “30” when Final Construction or Facilities Management.
- IAPS-E:** Allows for an IT103 and IT105, an IT104 and IT108 combination, or an IT107. Only one discount combination is allowed. Discount percentage is limited to NN.NN.
- Navy ERP:** Allows up to five instances of ITD03 and ITD05, ITD08 and ITD04 or ITD07. Navy ERP allows only one entry for Net Days ITD07.
- FABS:** When the payment and acceptance location codes are FABS, any Discounts submitted with the 2N1 will be ignored.

**Notes:**

- iRAPT rejects transactions with IT106 codes that are not listed within the Product/ Service ID Qualifier Codes table.
- iRAPT will only accept one pair of product/service data (IT106/IT107).
- If Product/Service ID Qualifier in IT106 is FS, then the Product/Service ID (NSN) must be 13 numeric characters reported in IT107. If an NSN is available, use "FS" in IT106 and the associated number in IT107. If you have other pertinent information associated with any other codes for the shipment, then enter that information (e.g. "CL" entered in IT106) and the pertinent color/information (e.g., blue or yellow, etc.) in IT107. If an NSN is not associated with the shipment, use any code other than "FS" in IT106 and the word

“NONE” in IT107. Product/Service ID Qualifier and Product/Service ID information is not allowed for NAVCON.

- If MOCAS paid or DCMA administered and supplies (N101 = “ST”) is selected, then the Product Service ID Qualifier (IT106) “SV” is not allowed.
- If MOCAS paid or DCMA administered and services (N101 = “SV”) is selected, then the Product Service ID (IT107) must be “SERVICES” and the Product Service ID Qualifier (IT106) must be “SV”.

**Notes:**

- If RQ is used in REF01, MILSTRIP number must be in REF02, followed by REF03 noting MILSTRIP Quantity. The total MILSTRIP quantity (which in some instances may include the MILSTRIP number of “NONE”) must equal the associated Line Item quantity reported in IT102.
- iRAPT will ignore REF01 if REF02 is not populated.
- Duplicate MILSTRIPs are not allowed for Line Items.
- “NONE” can only be sent as a MILSTRIP once per Line Item and “NONE” cannot be the only MILSTRIP for a Line Item.
- MILSTRIPs are only allowed for CLIN/SLIN type Line Items.

**REF03 – ACRN Price and Reference Shipment Amount**

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

**iRAPT Payment System Edit Notes:**

MOCAS, EBS, One Pay, CAPS-C/W, Navy ERP:

- ACRN is optional and if used must be two alphanumeric characters.
- Except for One Pay documents, if single ACRN is submitted, the ACRN dollar amount is optional in REF03. However, if submitted, the amount must match the extended Line Item total. One Pay ACRN entries must have ACRN amounts in REF03.
- If multiple ACRNs (>1) are submitted, the ACRN dollar amount is mandatory in REF03 and the sum of the ACRN dollar amounts must balance to the extended Line Item total.
- CICON does not allow multiple ACRNs to be reported.
- Multiple ACRNs are not allowed to be reported on the EBS Pay System.
- NAVCON – does not allow ACRN, SDN, AAA, MILSTRIP, or Reference Shipment Number.
- For One Pay and EBS, ACRN amount must be between -999,999,999.99 and 999,999,999.99 and can only contain up to 2 digits to the right of the decimal. For all other pay systems, ACRN amount must be between -9,999,999,999.99 and 9,999,999,999.99 and can only contain up to 2 digits to the right of the decimal.
- SDN, ACRN and AAI are not allowed for Energy Invoices.

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.

**iRAPT Payment System Edit Notes:**

- All Entitlement Systems require the attachment of a document substantiating miscellaneous transportation charges greater than \$100.
- **MOCAS:** Optional and only allows for I260 or F460 in the SAC02.
- **EBS:** Optional and only allows for I260. The amount that follows must be <\$250.00.
  - Note: Allowances are not permitted for MOCAS or EBS.
- **One Pay:** Optional and allows any valid miscellaneous fee, yet only allows for three fees and allowances per Invoice. However, if Vendor wants to submit direct transportation charges (Miscellaneous Charge Code I260) then must submit as CLIN9999, with line item type of 1, Product/Service ID of “NONE,” Product/Service ID Qualifier of VP, quantity of 1, Unit of Measure of EA, and Unit Price of the amount they are claiming.
- **CAPS-C/W:** Optional and allows I260 only in SAC02 when SAC01 is “C” for miscellaneous charge. Any SAC02 allowance codes (SAC01 = A) may be entered, up to 11 maximum.
- **IAPS-E:** Charge code F690 is not allowed in SAC02.
- **Navy ERP:** Allows all codes except I260 in SAC02.

Currency codes that allow exactly two positions to the right of the decimal may be submitted via EDI.

Currency codes that allow greater than two positions to the right of the decimal may NOT be submitted via EDI.

Currency codes that allow zero or one position to the right of the decimal may be submitted via EDI, however, the following rules will be applied:

- When the amount field is defined as a numeric field (N2), the decimal positions must be submitted with one or two zeros as needed to meet the X12 requirement that exactly two decimals are required for N2 fields.
- When the amount field is defined as a decimal number field (R) or an alpha/numeric string (AN),
  - The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
  - The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
  - If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
