## 1 General Instructions

The following pages represent the User Defined Format (UDF) for processing Progress Payments (PPR) transactions in Invoicing, Receipt, Acceptance and Property Transfer (iRAPT). Please refer to other UDFs to process the following documents: Receiving Reports, Receiving Report – Pack/RFID Update, Invoices and Invoice 2n1s, COMBOs, Cost Vouchers, Performance Based Payments, and Commercial Item Financing.

**NOTES:** If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create FTP files, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to iRAPT. This converts the text to text-only format and removes control characters that contain formatting information.

When submitting an attachment for a document, you must submit the attachments first, then the document file(s). Each attachment may only be used for a single document. A single attachment may not be used for multiple documents. If this is necessary, then submit the attachment with a unique name for each document.

**WARNING: Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into iRAPT.**

<http://www.acq.osd.mil/dpap/pdi/uid/index.html>

Website for detailed RFID information:

<http://www.acq.osd.mil/log/rfid/index.htm>

Each UDF layout includes the following:

1. Field            Sequential number of the Field contained within the layout record
2. Description    Description of information to be contained within the Field
3. Min/Max        Minimum and maximum amount of characters to be included within the Field
4. Progress Pay    Depicts whether the Field is:
  - M** – Mandatory – Usage is required.
  - O** – Optional – Can be used or not used.
  - C** – Conditional – Contingent upon another criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.)\_See Notes Column for specific instructions.
  - N/A** – Not Allowed

- |          |   |
|----------|---|
| 5. Notes | Contains notations of the Field's usage or restrictions within iRAPT    |
| 6. Type  | Contains the data Field type, (i.e. Alpha/Numeric, Numeric, Date, etc.) |

In addition, Fields to be included within iRAPT display the Field "Type" to depict the type of value to be included within the Field:

- **N** Integer Numeric Field
- **R** Decimal number. Where value includes decimal, iRAPT requires that decimal point and value be sent: iRAPT will NOT imply or assume decimal points.  
Examples:
  - 300 will be read into iRAPT as "300"
  - 3.00 will be read into iRAPT as "3"
  - 3.5 will be read into iRAPT at "3.5"
  - Decimal is included as part of Max Value – i.e. R8.2 = 11 characters
- **ID** Identifier
- **AN** Alphanumeric String
- **DT** Date – All Date Fields use format CCYYMMDD

*Notes:*

- All Line Numbers, if used, must be followed by an asterisk ("\*") field separator. Each Field within the line must also be followed by a caret ("^") field separator unless it is the last Field in the Line Number that contains data.
- Above and below each Layout, there is a list of values for the Fields that have identifiers. The values that iRAPT accepts for this document type are bolded.
- Because the basic import file layout is the same for all document types, Fields that are allowed by iRAPT but not used within this UDF are shaded. iRAPT will not accept information included within shaded Fields.
- Special characters should not be sent to iRAPT via Secure FTP. If special characters are sent, iRAPT will remove them.
- For Lines not used within this guide – a note states, "Skip this Line."
- Address information for valid Commercial and Government Entity (CAGE) codes is downloaded from the System for Award Management (SAM) database.
- Address information for valid DoDAAC and Military Assistance Program Address Code (MAPAC) codes is downloaded from Defense Automatic Addressing System Center (DAASC) database.

- Referenced Microsoft Word documents are accessible via the iRAPT Website.
- The term DoDAAC is used within this guide to represent DoDAAC or MAPAC.
- All FTP files sent for Progress Payments must have the following extension: .ftp2
- All monetary values for Costs Worksheet (Line Numbers 10, 10A, 10B, 11, 11A and 12) are in whole numbers for Progress Pay FTP filing.
- PPR does not allow EBS or ONE-PAY.
- In every location where the system is expecting a letter code or ID code, the letters must be capitalized. For example: Yes/No responses – the “Y” or “N” must be capitalized, Product/Service ID Qualifier Codes and Transportation Method/Type Codes must also be capitalized.
- The word “must” in a Line Note implies that the Line is mandatory. The word “may” in a Line Note implies that this Line is Conditional based on the terms of the contract or the needs of the contractor.
- Minimum/Maximum allowable field sizes for all monetary fields other than Costs Worksheet fields (Line Numbers 10, 10A, 10B, 11, 11A and 12) will be affected when using foreign currencies.
- The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- For currencies that allow more than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will be decreased to accommodate the extra digits allowed past the decimal. For instance, a monetary field that allows a maximum field size of 8.2 would allow a maximum field size of 7.3 when using a foreign currency that allows 3 decimal positions.
- For currencies that allow less than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will remain unchanged.

## **Instructions from the Contractor's Request for Progress Payment (Standard Form SF1443) – 6/2009:**

### **INSTRUCTIONS**

Item 2. **FROM - CONTRACTOR'S NAME AND ADDRESS/ZIP CODE** - Enter the name and mailing address of the contractor. If applicable, the division of the company performing the contract should be entered immediately following the contractor's name.

Item 3 Enter an "X" in the appropriate block to indicate whether or not the contractor is a small business concern.

**Field 3 – *Associated Dollars***

- Minimum/Maximum allowable field sizes for all monetary fields for ACRN and FMS Worksheets will be affected when using foreign currencies.
- The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- For currencies that allow more than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will be decreased to accommodate the

extra digits allowed past the decimal. For instance, a monetary field that allows a maximum field size of 8.2 would allow a maximum field size of 7.3 when using a foreign currency that allows 3 decimal positions.

- For currencies that allow less than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will remain unchanged.
