1 General Instructions

The following pages represent the User Defined Format (UDF) for processing Performance Based Payment and Commercial Item Financing (PBP/CIF) transactions in Invoicing, Receipt, Acceptance and Property Transfer (iRAPT). Please refer to other UDFs to process the following documents: Invoices, Receiving Reports, Receiving Report – PACK/RFID Update, COMBOs, Cost Vouchers, and Progress Pay.

NOTES: If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create FTP files, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to iRAPT. This converts the text to text-only format and removes control characters that contain formatting information.

When submitting an attachment for a document, you must submit the attachments first, then the document file(s). Each attachment may only be used for a single document. A single attachment may not be used for multiple documents. If this is necessary, then submit the attachment with a unique name for each document.

WARNING: Invoicing, Receipt, Acceptance and Property Transfer (iRAPT) is designated for Sensitive Unclassified information ONLY. Do NOT upload classified attachments into iRAPT.

Website for detailed RFID information:

<http://www.acq.osd.mil/log/rfid/index.htm>

Each UDF layout includes the following:

1. Field Sequential number of the Field contained within the layout record.
2. Description Description of information to be contained within the Field.
3. Min/Max Minimum and maximum amount of characters to be included within a Field.
4. Requirements Depicts whether the Segment is:
 - M** – Mandatory – Usage is required.
 - O** – Optional – Can be used or not used.
 - C** – Conditional – Contingent upon another criteria being met. (Field is not mandatory or optional, e.g. Extension Fields to Department of Defense Activity Address Codes (DoDAAC); use if a DoDAAC is present.)_See Notes Column for specific instructions.

N/A – Not Allowed

- 5. Notes Contains notations of the Field’s usage or restrictions within iRAPT.
- 6. Type Contains the data Field type, (i.e. Alpha/Numeric, Numeric, Date, etc.).

In addition, Fields to be included within iRAPT display the Field “Type” to depict the type of value to be included within the Field:

- **N** Integer Numeric Field
- **R** Decimal number. Where value includes decimal, iRAPT requires that decimal point and value be sent: iRAPT will NOT imply or assume decimal points.
Examples:
 - 300 will be read into iRAPT as “300”
 - 3.00 will be read into iRAPT as “3”
 - 3.5 will be read into iRAPT at “3.5”
 - Decimal is included as part of Max Value – i.e. R8.2 = 11 characters
- **ID** Identifier
- **AN** Alphanumeric String
- **DT** Date – All Date Fields use format CCYYMMDD

Notes:

- All Line Numbers, if used, must be followed by an asterisk ("*") field separator. Each Field within the line must also be followed by a caret ("^") field separator unless it is the last Field in the Line Number that contains data.
- Special characters should not be sent to iRAPT via Secure FTP. If special characters are sent, iRAPT will remove them.
- For Lines not used within this guide – a note states, “Skip this Line.”
- Address information for valid Commercial and Government Entity (CAGE) codes is downloaded from the System for Award Management (SAM) database.
- Address information for valid DoDAAC and Military Assistance Program Address Code (MAPAC) codes is downloaded from Defense Automatic Addressing System Center (DAASC) database.
- Referenced Microsoft Word documents are accessible via the iRAPT Website.
- The term DoDAAC is used within this guide to represent DoDAAC or MAPAC.

- In every location where the system is expecting a letter code or ID code, the letters must be capitalized. For example: Yes/No responses – the “Y” or “N” must be capitalized, Product/Service ID Qualifier Codes and Transportation Method/Type Codes must also be capitalized.
- All FTP files sent for PPB/CIF documents must have the following extension: .ftp2
- PBP/CIF does not allow EBS or Navy ERP FTP transactions.
- Below each Layout, there is a list of values for the Fields that have identifiers. The values that iRAPT accepts for this document type are bolded.
- iRAPT will not accept information included within shaded Fields.
- The word “must” in a Line Note implies that the Line is mandatory. The word “may” in a Line Note implies that this Line is Conditional based on the terms of the contract or the needs of the contractor.
- Minimum/Maximum allowable field sizes for all monetary fields other than Event Price will be affected when using foreign currencies.
- The system will pad zeroes to right of the decimal point up to the number of digits allowed for a Currency Code.
- The system will drop zeroes to the right of the decimal point if they exceed the number of digits allowed for a Currency Code.
- If a non-zero number is given to the right of the maximum number of allowable decimal places as specified by the Currency Code, an error will be given.
- For currencies that allow more than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will be decreased to accommodate the extra digits allowed past the decimal. For instance, a monetary field that allows a maximum field size of 8.2 would allow a maximum field size of 7.3 when using a foreign currency that allows 3 decimal positions.
- For currencies that allow less than 2 positions to the right of the decimal, the number of digits that may be entered left of the decimal point will remain unchanged.
- iRAPT only accepts X12 Unit of Measure Codes.
