## Welcome to Wide Area Workflow!

Please start by selecting one of the links from the menu above.

### WARNING!

- If using a word processor program (i.e. Microsoft Word, WordPerfect, Microsoft WordPad, Microsoft Write, etc.) to create FTP files, EDI files, or to cut-and-paste text field data into the WAWF Web application, then the text must first be cut/copied out of the word processor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to WAWF. This converts the text to text-only format and removes control characters that contain formatting information.
- Please DO NOT use the browser BACK BUTTON within the WAWF application.
- The use of the browser's BACK BUTTON is not supported within the WAWF application when completing electronic forms.
- Use of this button will cause the loss of data not yet saved to the server.
- Where they exist, use the PREVIOUS or RETURN buttons to return to a previous page within the WAWF application.
- In data capture and when reviewing documents, you may move from tab to tab to work with the various information categories, e.g., Document Header, Addresses, Comments, Line Items, etc.

This demonstration provides an overview of the ECP0667 changes for creating a Property Transfer Document as a Contractor Property Shipper.

ECP 0667 provides the capability of identifying whether an item being shipped, delivered or accepted is Special Tooling (ST), Special Test Equipment (STE), or Not Special Tooling or Test Equipment.

This presentation contains audio narrative. Please adjust your volume accordingly.
