**Welcome to Wide Area Workflow!**

start by selecting one of the links from the menu above.

**WARNING!**

- If using a word processor program (i.e. Microsoft WordPad, Microsoft Write, etc.) to create FTP files, EDI files, or to cut-and-paste text field data into the WAWF Web application, then the text must first be cut/copied into a text editor program and pasted into Microsoft Notepad, or another ASCII text editor and saved in the text editor, before sending the data to WAWF. This converts the text to text-only format and removes control characters that contain formatting information.
- Please DO NOT use the browser BACK BUTTON in the WAWF application.
- The use of the browser's BACK BUTTON is not supported within the WAWF application when completing electronic forms.
- Use of this button will cause the loss of data not yet saved to the server.
- Where they exist, use the PREVIOUS or RETURN buttons to return to a previous page within the WAWF application.
- In data capture and when reviewing documents, you may move from tab to tab to work with the various information categories, e.g., Document Header, Addresses, Comments, Line Items, etc.
