If an existing Government user logs in with a User ID / Password, then WAWF will check the CAC exemption table to determine if that user has an active DoDAAC, User ID, or C/S/A (Commands/Services/Agencies for EDA roles) in that table.

If the user does have active DoDAACs or C/S/A in that table, then the user can logon using User ID/Password.

## Change Authentication

As of WAWF release 5.4, all government users and government support contractors MUST use a Common Access Card or Software Certificate to logon to WAWF. WAWF uses a Java Applet for CAC Card and Software Certificate logon and signing. Click the Help Button below for setup instructions for using the WAWF Java Applet. Please click the "Certificate Association" button below and select the certificate you wish to associate with this account once your machine is set up properly.

### New User Authentication

Authentication Type	Valid From Date	Valid To Date	Subject Common Name	Serial Number	Actions
Common Access Card	2011/03/30 16:59:08	2014/03/30 16:59:08	CACI.Tester40.9000040832	64C2	<a href="#">Remove</a>

Once the user selects their certificate, the New User Authentication section will be displayed with details on the certificate they have chosen.

The user can click the 'Remove' link to remove this entry and change to another certificate or they can click the 'Submit' button to associate this certificate with their current account and continue login.

Welcome to Wide Area Workflow!

Please start by selecting one of the button links from the menu above.

Vendor and Vendor View Only roles will automatically be granted access to EDA if they registered against a CAGE with no extension.

The EDA link will show up for all WAWF Vendors, as long as the Vendor has at least one CAGE without an Extension.

For Government roles, if the User ID is registered for a role with EDA access, an EDA link will be present.

Once the EDA - Columbus or EDA - Ogden link is selected, the OAuth process will begin.

If the authorization is successful, a new window will open and the user will be logged into the EDA system.

They will not need to re-enter their User ID/Password or certificate/CAC to login to EDA.
