Welcome to Wide Area Workflow e-Business Suite. This demonstration contains audio narrative. Please adjust your volume accordingly.

This presentation will demonstrate the functionality of Web Service Administration as a PIERE Super Administrator.
Step 2

Proceed to the WAWF e-Business Administration Console.

Step 3

Next click on Web Service Administration.
Step 4

For 'The Web Service Registration' link, this is to register a user for the Web Services Attachments role.

Click the Web Service Registration link.

---

Step 5

The mandatory fields will be:
- Logon type (System Name / Password or Certificate)
- First Name
- Last Name
- Commercial Telephone number
- E-mail address
- Organization
- Job Title
- System Name
- DoDAAC
Step 6

To add a DoDAAC, type in the DoDAAC and click Add as shown next to the entry field.

Step 7

The DoDAAC has been added. Adding multiple DoDAACs is permitted.
Step 8

After filling in the required fields click the Submit button.

Step 9

A System registration has been completed successfully message will display.
Step 10

An email will be sent to the email the user.
A password will be given in the email to log into the web service that was registered.

Step 11

Click Activation and Information.
Step 12

The ‘Activation and Information’ tab is to Edit/activate/deactivate the web service. There are many ways to search for an SYSUID. For example, the previous registered web service will be searched by location code.

Step 13

Next the screen will display the registered web services under the searched location code. Click the System Name and the information for the web service can be edited.
Step 14

The first tab is the Profile tab. This will allow for the information pertaining to the profile to be edited. The fields highlighted in grey cannot be edited. Click Save once the information has been changed.

Step 15

The next tab is Justification/Attachments, which allows the user to add Justifications and Attachments.
Step 16

To reset the password, enter justification and click Save. This will send a one-time user password to the email provided.

Step 17

To activate/deactivate a role, check the Change Status box as shown above on the far right. Then click Next.
Step 18

The screen will display the Current status and the New status. Click Submit to change the status.

Step 19

Next the screen will display Systems have been successfully activated or deactivated.
Step 20

Click Web Service Documentation.

Step 21

The Web Service Documentation page provides documentation such as WSDL and Schema for web services.
This concludes our demonstration.
